

Three models of WACKER tamps are available - the BS 52Y and the two newest models, the BS 500 and BS 600. All are suited for the compaction of granular, mixed and cohesive soils in confined areas. The BS52 Y features the exclusive high capacity self-cleaning air filter that will last the life of the Rammer under normal use conditions, Large Capacity fuel tank, combined fuel and engine shut-off switch, shock mounted guide handle, oil sightglass, fully sealed oil-lubricated ramming system and the WACKER 2-cycle engine designed specifically for rammer applications. It will accept the 4" narrow ramming foot. The BS 500 and BS 600 are heavier tamps and offer several new design features. In addition to the features of the BS 52Y, these models have a single lever that controls engine starting, speed and stopping and an exclusive noise reducing cover that lowers the amount of engine and shoe noise transmitted to the operator. This cover also serves to better protect the fuel line, sparkplug and fuel/engine control apparatus. Weight kg 57, Shoe size (w x l) mm 160x330, Compaction depth cm 45, Engine type WACKER 2-stroke, Dimensions (l x w x h) mm 665x365x990.
